- 11:00 AM – 12:00 PM **Consumer Update** – Drake Ewbank

Extra Topic if Time Allows; Consideration for Future Meetings

State Outcome Measures Other than the NOMS

- What state outcome measures are being used other than the NOMS?
- How are they measured? (Share measures)
- By what method are the outcomes collected?
- For what populations? (Program-specific? Age-specific (child, adult, etc.?)

Translating evidence to practice: Quality improvement efforts using the NOMS or other data

- How are our SMHA's improving the MH system through the use of data?
 - o Are administrators/legislators using the data to inform policy?
 - o Are providers using the data to inform practice?
- What are the barriers to the use of data for QI at the provider or policymaker level?
- Is providing data reports enough or do we need to generate and promote ideas?
- Is there a role for consumers to fill in the QI process?
