Definitions

Personal Learning Environment (PLE): A system that help learners take control of and manage their own learning by helping learners set their own goals, manage their learning, and communicate with others throughout the process of learning.

Personal Learning Network (PLN): The network created when learners interact and connect with others in a connected personal learning environment (PLE) to guide learning, acquire knowledge, share information, answer questions and contribute to your professional development.

Social Media/Social Web: The interactive, social spaces where individuals gather on the Internet. These spaces contain user-generated, content shared among a community of individuals and connected online networks.

TWITTER

Twitter provides the opportunity to have micro-conversations in 140 characters or less. This is a great avenue to connect to other professionals, learn about trends and share resources (URLs, videos, pictures, conference materials, etc) with a variety of professionals. Set up an account, it is free, and fairly straight forward. Once you have selected a username (choose one that is either the real you, or has an advising spin) then you are on your way to creating a network of like minded advising professionals and educators thirsty for relevant information about higher education.

Hashtags & Backchannels

Hashtag: A symbol used in Twitter messages, the # symbol, used to identify keywords or topics in a Tweet. The hashtag was an organic creation by Twitter users as a way to categorize Twitter messages and link keywords posted on Twitter.
